

PROJECT NAME: <Vending Machine>

Test Script Name:

User is hungry and would like to purchase a snack from a vending machine. User is presented with a keypad with buttons that correspond to the items available for purchase. There is also an insertion point for paper money and coins. In this scenario, the user has exact change.

Scenario/Purpose:

Prerequisites:

User has viewed and decided which item to purchase, located at E5.

Name of Tester:

Date:

Time:

Step	Description	Expected Results	Pass
1 Input selection on keypad	Press "E" and then "5"	Digital display should indicate the price of the item selected. Digital display should subtract the amount of each inserted coin or paper money from the total price of the item. Once total is met or exceeded, the machine will dispense the item.	
2 Submit payment	Insert paper money in the bill slot and/or coins in the coin slot	Digital display indicates "Item E5 dispensed"	
3 Retrieve item	User should reach into the tray of dispensed items to retrieve the item.
